---

Raji – as discussed, I found some errors in the table included in Attachment D-1 to the Scope of Work for AOI-1. There were 11 sample locations listed in the “on-property” section that are actually “off-property”. The error is a result of the discrepancy between the property boundary and the perimeter fence, which are not the same. I’ve made those changes and the revised Attachment D-1 is attached. I’ve also re-attached Figure 6. The 11 sample locations were moved from the “on-property” section to the “off-property” section of the table starting on page D-1-7. There are no other ripple effects and Figure 6 is still accurate. I also fixed one other typo related to the “off-property” issue in the section below the table titled MONITOR WELL SAMPLE LOCATIONS, because three of the monitoring wells are actually “off-property”. There were no other changes made.

I apologize for not catching this sooner.

Please let me know if you have any questions.

Regards,

Matt
